Password: ARHS123

Students have been working on the Microburst Softskills curriculum throughout the year. Each student needs to make sure that they have completed all of the modules. Students will first watch the module video, complete the post assessment, and then complete the certification assessment. If you do not earn a passing grade on the certification assessment, please email your teacher as they will have to contact the Microburst team to reset the assessment. Do not move forward to the certification assessment until you feel ready as each test can only be taken twice.
